GovDirect

CASE STUDY

See How GovDirect Provides a Department with Durable Rear-View Camera Solutions to Improve Safety

Challenge: Back up accidents in company vehicles are costly, dangerous, and preventable. When fleet operations aim to meet safety compliance standards by implementing rear-view cameras in their fleet, **GovDirect has the solutions and the *experience* to complete mass deployments.** Many company vehicles need rugged cameras that perform in varying climates and can be installed in a wide range of vehicle models.

Solution: Rearview cameras help detect people and objects behind vehicles to avoid injuries and damage to company property. GovDirect and Mobile Installation Technologies (MIT) have completed a project to outfit vehicles at 85 company locations with Back Up Cameras.

Result:

3200 vehicles are now successfully retrofitted with rugged back up cameras. The GovDirect team is equipped with the resources to thoroughly train employees on how to supplement vehicle safety procedures with the additional coverage and rear view visibility with back up camera and monitor solutions.

Call us today and we can help you find the right backup solution for you
